DV EAS FLCBQ VD
TRAWM VUPQ QUW X DECGQCWT YQ YAFL VLQS YQKLHQ SNAFQ VML LHVQPAWR
NQG VFUSR EC WAWY QP
FN WGAFDWG

Decryption method:

The ciphertext was encrypted using two layers:

1. Caesar cipher with shift +7
2. Vigenère cipher with keyword: KEY

Encryption order:

Plaintext → Caesar(+7) → Vigenère(KEY) → Ciphertext

Decryption order:

Ciphertext → undo Vigenère(KEY) → undo Caesar(+7) → Plaintext

Recovered plaintext (raw):

THE MAN IS IN THE HOUSE AND HE IS VERY CLOSE TO THE GATE AND THE DOOR IS
LOCKED AND HE
CANNOT GET OUT BUT HE IS STILL HOPING THAT SOMEONE WILL COME TO HELP HIM
BEFORE THE
POLICE ARRIVE

Cleaned plaintext:

The man is in the house and he is very close to the gate and the door is locked and he
cannot get out but he is still hoping that someone will come to help him before the
police arrive.
