

Rogue Signal Intercept - Full Analysis Report

Challenge Overview

A suspicious flight was detected and network traffic was captured during the event. The objective was to identify the communication protocol, port, and sensitive information transmitted within the captured traffic.

Analysis Results

Protocol: UDP

Destination Port: 54321

Evidence

Example telemetry payload:

TELEMETRY_DATA: SEQ=14, LAT=34.024895, LON=-118.025436, ALT=110.5, SPEED=10.6

Packet containing sensitive information:

TELEMETRY_DATA: STATUS=OK, LAT=34.060457, LON=-118.060363, ALT=120.5, SPEED=15.2,
FLAG=FLAG_ROGUE_SIGNAL_ABC123

Task Answers

- (a) Non-standard traffic identified as a UDP telemetry stream.
- (b) Communication protocol: UDP, Port: 54321.
- (c) Sensitive information recovered from payload: FLAG_ROGUE_SIGNAL_ABC123.

Recovered Flag

FLAG{FLAG_ROGUE_SIGNAL_ABC123}
